# Child Safe Organisation Seminars

Network, in collaboration with the NSW Commission for Children and Young People, are presenting a series of the extremely popular Child Safe Organisation seminars. These seminars are being offered to all services who are members of Network.

At the seminar you will gain an understanding of what risk management strategies your organisation needs to adopt to help make it Child Safe. The session will include information on keeping kids safe from abuse in your organisation and your obligations under the Working with Children Check.

Services will also receive valuable information on developing a Child Safe policy that will meet the requirements of the upcoming National Quality Framework.
